Photoshop-Animation

AnimDessin2 & AnimCouleur2

Photoshop Scripts & Panels for Animation

This Section on GitHub contain the Manual installer of my Photoshop Extensions dedicated to cel-animation (frame-by-frame):

- **AnimDessin2:** This panel is designed for Photoshop CC 2014+. It allows you to draw frame-by-image animations (cel-animation like), simplifying the process. it also lets you test the movie and set the duration of a keyframe...
- **AnimCouleur2:** This panel is available for Photoshop CC 2014+. It allows you to simplify the process of coloring frame-by-image drawing animations created with "AnimDessin2".

The 2 **ZXP files** are the **Installers** of **AnimDessin2** and **AnimCouleur2**.

- Actually, **these Installers are the up-to-date versions of AnimDessin2** and **AnimCouleur2**.
- I didn't had the time yet to fix the Addons Portal versions!

Photoshop CC 2017 Installer

Installer compatible with the Photoshop versions from CC 2014 to CC 2017+

How to install AnimDessin2 and AnimCouleur2:

1. **Download** the **installers/ressources**:
    - For **AnimDessin2**, download "**AnimDessin2_CC17.zxp**" and "**AnimDessin2-Scripts**" folder from my GitHub.
    - For **AnimCouleur2**, download "**AnimCouleur2_CC17.zxp**", "**AnimCouleur2_Tools.tpl**", and "**AnimCouleur2-Scripts**" folder from my GitHub.
    - Here my GitHub: https://github.com/sbaril/Photoshop-Animation
    - *BTW: in my tests this installer also works for CC 2014, 2015 and 2015.5.*

2. **Download** the **ExtensionManager** from Anastasiy:
   http://install.anastasiy.com/
   - **Launch ExtensionManager** and install "AnimDessin2_CC17.zxp" using one of these 2 methods:
     1. Choose the **Install** menu and locate the "**AnimDessin2_CC17.zxp**" on your computer.
     2. **Drag and drop** the "**AnimDessin2_CC17.zxp**" file on the **ExtensionManager window**.

3. **Extension Presets** Manual **Installation**:
   - **Copy** the "**AnimDessin2-Scripts**" and/or "**AnimCouleur2-Scripts**" folders in your Programs/Applications > "Adobe Photoshop CC 2017" (or your version: CC 2014, 2015, 2015.5 or 2017) > "Presets" > "**Scripts**" folder.
   - **Tips**: Assign Shortcuts to these Scripts using the menu "Edit" > "Keyboard Shortcuts" > "Application Menus" > "File" > "Scripts" section.
   - **Copy** the "**AnimCouleurs2_Tools.tpl**" file in your Programs/Applications > "Adobe Photoshop CC 2017" (or your version: CC 2014, 2015, 2015.5 or 2017) > "Presets" > "**Tools**" folder.

4. **Launch Photoshop**:
   - To open the panel go to the menu **Window** > **Extensions** > **AnimDessin2** and/or **AnimCouleur2**.
   - Please verify if the "AnimD2*...*" and/or "AnimC2..." scripts are available in the submenu: **File** > **Scripts**. *(Useful if you want de define Keyboard Shortcuts).*
   - For AnimCouleur2, load "**AnimCouleur2_Tools**" from the **Tool Presets flyout menu**.
   - Quit Photoshop to automatically save the Presets Preferences (Tools loaded and Keyboard Shortcuts). *In case of you'll crash Photoshop that will prevent you to do these steps again!*
   - **Relaunch Photoshop** and you're **ready** to go :)

....

Archive: "Photoshop CC 2014, 2015 and 2015.5 Installer"

How to install AnimDessin2 or AnimCouleur2:

1. Download and Unzip **AnimDessin2-CC-2015.zip** and/or

AnimCouleur2-CC-2015.zip

- Read the "README.md" or "README.pdf" file inside each Unzipped folder.
- AnimCouleur2 need an extra step to install the Tool Presets.

2. Launch Photoshop and select:
   - File > Scripts > Browse...
   - Browse your file system to find the "installer.jsx" file contained in the "AnimDessin2-CC-2015" and/or "AnimCouleur2-CC-2015" unzipped folder.
   - Relaunch Photoshop
   - To open the panel go to the menu Window > Extensions > AnimDessin2 and/or AnimCouleur2
   - Please verify if the "AnimD2*...*" *and/or "AnimC2...*" scripts are available in the submenu: File > Scripts. *(Useful if you want de define Keyboard Shortcuts).*

Archive: "Workaround if you have any issue with the installer"

The previous installer had an issue with Photoshop CC 2015.5 but it is fixed now. I leave the following workaround instructions in case of anything like that happened in the future... I hope not!

2 possible Workaround Solutions

1. **Simply install the Scripts with no UI**
   - Copy the "AnimDessin2-Scripts" and/or "AnimCouleur2-Scripts" folders in your Programs/Applications > "Adobe Photoshop CC 2015.5" (or your version) > "Presets" > "Scripts" folder.
   - Assign Shortcuts to these Scripts using the menu "Edit" > "Keyboard Shortcuts" > "Application Menus" > "File" > "Scripts" section.

2. **Buy a nice extension to have a UI**
   - Copy anyway this folder(s).
   - Buy the "PS Custom Tools Panel" here: http://pspowertools.com
   - Install it and load in it my scripts (keep the PNG icons beside the JSXs).
     - Tutorial on this extension: https://www.youtube.com/watch?v=TigG7yNuFys

Here a quick tutorial on how to use this solutions!
